Earthheart™
growing trees and shrubs beautifully!

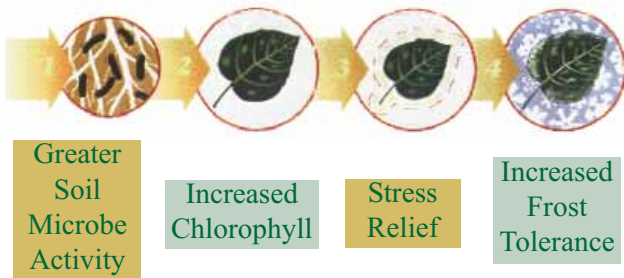

Our earth needs protecting.

There is no denying that the use of harmful chemicals in our atmosphere, water, and soil are ruining the earth. Our products are designed to bring the soil and plant-life back in balance. Earthheart™ Plant Food's primary plant nutrients are derived from mined potassium sulfate and sea kelp extracts. Earthheart™ uses only premium quality products, specially formulated for shrubs and deep root feeding of trees.

The Four Basic Effects of Sea Kelp

The high quality ingredients in Earthheart™ sea kelp. This amazing products stimulates beneficial soil microbe activity, especially in tree and plant roots. This improves rooting and helps fight off disease, and soil pests. At the same time, it works to release more nutrients to the plants.

Sea kelp increases levels of plant chlorophyll, the green pigment essential for tree and plant development. This ensures better use of energy from the sun, fueling strong healthy growth. The formation and development of feeder roots is almost entirely dependent upon good, healthy foliage. Leaves process nutrients that a tree needs for root development. Any loss of leaves results in a corresponding loss of feeder roots and the tree's whole nourishing process becomes greatly restricted.

Sea kelp acts within the plant, raising its natural defense mechanism to a higher level. As a result, it is better equipped to resist pests and diseases, diverting more of its energies into growth with reduced stress.

Sea kelp may also help the tree with-stand the pressures of frost, reducing damage at critical stages of growth.

We use the highest quality ingredients in our Earthheart™ horticultural products, including a blend of NON-TOXIC and natural formulas made from sea kelp and humic acids.

For healthier trees, shrubs, vegetable garden, flowers and house plants, use our Earthheart™ products.

Earthheart™ 18-16-9 Tree & Shrub Plant Food

Our signature series tree food. We use ingredients of all natural sea kelp, plus special humates to complete the formula. This special blend makes for the finest tree food available, with no fillers. We don't use chemicals to force tree growth. The making of greener, healthier trees and shrubs in and around your home has just been made easier for you for deep root feeding, naturally.

Earthheart™ All Purpose Insect Spray

These products are made from permethrin, thus are safe to all warm blooded creatures. This spray is very effective in "knocking out" insects. We can spray the insecticide or mix it with Earthheart as it works systemically as well.
